

ENVIRONMENTAL POLICY STATEMENT

Our Philosophy:

At Watly Engineering Ltd we work actively to reduce the environmental impact of our own operations and in everything we do in all aspects of our operations with the aim of meeting and exceeding customer expectations through sustainable practices.

Our Policy:

Watly Engineering Ltd is committed to achieving high environmental standards across all areas of its activities. We are dedicated to protecting the environment, complying with all applicable environmental legislation and regulations, and continually improving our environmental performance.

Environmental objectives are considered equally alongside all other business objectives when planning and allocating resources.

All managers, employees, subcontractors, and suppliers working on behalf of the company have responsibilities under this Policy. Environmental performance is regularly monitored through audits and quarterly management reviews, during which environmental impacts are assessed and improvement actions are implemented.

Aims of this policy:

Watly Engineering Ltd recognises that environmental protection is a core responsibility and requires all business activities to be conducted in a sustainable manner. We are fully committed to best environmental practice and continuous improvement and will encourage employees, business partners, and stakeholders to support this commitment.

This Policy sets out our commitment to preventing pollution, reducing environmental impact, and continually improving environmental performance across all operations.

Environmental Management Approach

In order to achieve this objective, we are:

- Establishing clear environmental responsibilities, with ultimate accountability held by management and integrated into strategic business planning.
- Developing and maintaining processes that promote an environmentally aware culture and ensure compliance with all applicable environmental legislation, regulations, and codes of practice.
- Actively preventing pollution and minimising environmental harm arising from our activities.

Watly Engineering Ltd is committed to setting measurable environmental objectives and continually improving environmental performance through regular audits and quarterly reviews.

Key Environmental Impacts

The company recognises our key impacts to be in the areas of:

- Waste management and disposal
- Energy use
- Raw material use
- Emissions to air
- Utilities usage
- Transport
- Procurement

POLICY OBJECTIVES

Watly Engineering Ltd will strive to adopt the highest environmental standards in all operations and meet or exceed all relevant legal and regulatory requirements.

Objectives

- Ongoing assessment of our activities to identify areas where we can minimise impacts.
- Minimise waste through careful and efficient use of all materials and energy and adopting the principles of 'reduce, reuse and recycle'.

- Purchase sustainable products wherever feasible [e.g. recycled, FSC or low environmental impact products and energy from renewable sources].
- Encourage good environmental practice and participation by its employees and sub-contractors in all environmental matters.
- Adopt an environmentally-sound transport planning strategy.
- Reduce risks from environmental, health or safety hazards for staff, sub-contractors and others in the vicinity of its operations.
- Develop solutions for environmental problems.
- Include environmental and ethical considerations in investment decisions where appropriate.

Watly Engineering Ltd recognises that environmental responsibility is integral to sustainable business success and is committed to ensuring this Policy is communicated, understood, and implemented at all levels of the organisation.
